₹2,199 /line/month

Taxes extra, as applicable.

Advanced business communication designed for growing teams and enterprises that need intelligent call management, seamless integrations, and centralized communications.

Features & Capabilities

Business Voice Calling

Inbound and outbound calling with supported business numbers and calling plans.

CloudPBX & Virtual Phone System

Cloud-based business telephony with centralized user and extension management.

IVR & Auto-Attendant

Professional greetings, interactive menus, and automated call distribution.

Smart Call Routing & Queues

Route calls to the right teams, extensions, or agents.

Call Monitoring & Supervision

Whisper, Barge-In, and Spy features where supported.

Call Recording

Record calls for review, training, and quality monitoring.

CDR, Analytics & Reporting

Access call-detail records and reporting tools to monitor communication activity.

AI Voice Assistant

AI-powered voice interaction capabilities, subject to feature availability.

AI Call Transcription

Convert supported call recordings into text for review and documentation.

Web & Mobile Softphone

Access business calling through supported web, desktop, Android, and iOS applications.

Microsoft Teams & SBC Integration

Connect business telephony with compatible Teams and Session Border Controller environments.

CRM, ATS & Custom API Integration

Integrate supported business applications and communication workflows.

Business SMS & Messaging

Messaging capabilities subject to number eligibility, registration, and usage terms.

Branded Caller Name (CNAM)

Registered business-name display on supported outbound calls, subject to provider approval.

DID Numbers & Number Porting

Additional business numbers, preferred area codes, and porting assistance.

Technical Support

Technical assistance and account support based on your service agreement.

Optional Add-ons

10DLC Campaign Registration

Business messaging registration and compliance.

Virtual Fax

Cloud-based fax services.

IP Desk Phones & Hardware

Compatible desk phones and provisioning options.

Specialized Integrations

Custom implementation and advanced API workflows.

Enhanced AI Usage

Additional transcription or AI usage where applicable.

Enterprise-Ready Communication

Scalable business telephony, centralized call management, collaboration capabilities, and integration options to support your communication workflows.

All prices are exclusive of applicable taxes. GST and other applicable charges will be added to the final invoice. Optional add-ons, usage-based services, hardware, and specialized integrations may be charged separately. Feature availability depends on the selected package and service terms.

SMS & 10DLC Registration

Business Messaging & Compliance

Enable business messaging with 10DLC campaign registration for eligible US local numbers. Support application-to-person messaging workflows, campaign registration, and brand verification for compliant messaging.

Includes: Registration assistance, campaign submission, and compliance guidance. Carrier approval and messaging charges apply separately.

Branded Caller ID (CNAM)

Business Name Display

Help your business establish a recognizable calling identity by associating your registered business name with supported outbound calls, helping recipients identify your organization.

Includes: Business-name submission and configuration. Display depends on carrier, network, device, and CNAM database support.

CRM, ATS & Custom API Integrations

Connected Business Workflows

Connect SIPLINK calling capabilities with your existing CRM, applicant tracking system, or custom business application to streamline communication and reduce manual work.

Includes: API integration guidance, supported call-event connectivity, click-to-call or screen-pop workflows where supported, and custom integration scoping.

Microsoft Teams & SBC Integration

Unified Business Communications

Extend business calling into compatible Microsoft Teams environments using supported SIP connectivity and Session Border Controller configurations.

Includes: Integration planning, SIP configuration assistance, call-routing setup, and compatibility checks. Required licenses and third-party SBC costs may be additional.

Virtual Fax

Cloud-Based Fax Communication

Send and receive supported fax communications without relying on a traditional physical fax machine. A virtual fax solution can help centralize document transmission and simplify remote workflows.

Includes: Virtual fax account or service configuration, subject to the selected package. Fax number, usage, and document-volume charges may apply.

IP Desk Phones & Hardware

Business Phone Deployment

Equip teams with compatible IP desk phones for professional office calling, receptionist desks, and employee workstations.

Includes: Compatible device recommendations, SIP account provisioning, configuration assistance, and deployment guidance. Hardware, shipping, and installation may be charged separately.

Additional Numbers & Number Porting

Number Expansion & Migration

Add business numbers for new teams, locations, or departments, or transfer eligible existing numbers from your current service provider.

Includes: Number selection assistance, preferred area-code requests where available, porting coordination, and configuration support. Number rental, porting fees, and carrier charges may apply.

AI Transcription & Advanced Analytics

Intelligent Call Insights

Convert supported call recordings into searchable text and use call analytics to review conversations, identify trends, and support quality monitoring.

Includes: Available transcription and reporting capabilities, depending on the selected service. AI processing, transcription hours, storage, and advanced analytics may be usage-based.

SIPLINK AI ADDONS

AI Call Transcription

Speech-to-text intelligence

AI Add-on

Convert supported call recordings into searchable text for easier documentation, review, and recordkeeping.

Features

- Call-to-text transcription
- Searchable conversation records
- Improved call documentation
- Transcription usage options

Contact Sales

Pricing based on transcription hours and usage.
